

BMW CORPORATE NEWS.

Dear John

With the introduction of the new first year £0 VED rate there is an increased focus on cars emitting less than 130g/km CO2. The BMW range now offers 57 models under this threshold including the new BMW 520d Saloon which achieves 57.6mpg (combined) and reaches 62mph in only 8.1 seconds.

This new model continues BMW's commitment to EfficientDynamics technologies which improve performance and fuel consumption and lower emissions across the range. Thanks to this commitment we are proud to have been named Fleet Manufacturer of the Year in the 2010 Fleet World Awards, an event which also saw the BMW 5 Series Saloon named Best Executive Car.

September 2010 will see the introduction of the new BMW 5 Series Touring. With a high level of standard specification, this exciting new model combines elegant design and versatility with impressive performance and fuel economy.

In addition, the new BMW 3 Series Coupé is now available to order. With a host of enhancements to styling and performance, this car is set to remain the benchmark for drivers looking to retain a dynamic driving experience and sporty looks yet reduce their emissions and fuel consumption. An impressive 60.1mpg (combined) and emissions of just 125g/km of CO2 make the new BMW 320d Coupé a compelling fleet choice.

Yours sincerely

Stephen Chater
Corporate Operations Manager
