

BMW Corporate News

Valuable new Corporate additions

Dear Jon

BMW are pleased to announce the launch of the compelling new BMW 116d - the most efficient BMW ever produced. With combined fuel consumption of 64.2mpg from its 2.0-litre turbo diesel engine and CO2 emissions of only 118g/km, the BMW 116d is even more efficient than the World Green Car of the Year 2008, the BMW 118d.

The BMW 1 Series 3 and 5-door ranges also now offer a brand new Sport model - an upgrade from the ES trim offering enhanced residual values while drivers will also benefit from the added value of more equipment at no extra cost: including 17" alloy wheels and Sport seats.

The new BMW 5 Series Business Editions provide a range of additional equipment including leather upholstery, Bluetooth and BMW Navigation. For just £1,000 more than the SE, upgrade to the BMW 520d Business Edition and benefit from residual value enhancing specification worth £3,490. Upgrades are also available on the BMW 525d and BMW 530d Saloon and Touring ranges.

Also launching in March is the new long wheel base BMW 730Ld, offering best in class combined fuel consumption of 38.7mpg along with CO2 emissions of only 194g/km from the powerful 245hp six-cylinder diesel engine.

Contact the BMW Corporate Sales team on 0800 777 113, email corporatesales@bmw.co.uk, or contact your preferred BMW Dealership to find out more about the exceptional value of the new additions to the BMW range.

Yours sincerely

Stephen Chater
Corporate Operations Manager
