Dear John,

I am delighted to announce that the new BMW 5 Series Saloon and Touring range is now available in the UK.

The fuel economy of the new models is outstanding. For example, the new BMW 525i automatic achieves a 25.3% improvement in combined-cycle fuel efficiency compared to the current model, while the 525d automatic better its predecessor by 21.5%.

The new BMW 5 Series range also includes a wealth of features and innovative technologies, offering desirable benefits to company car drivers. These include High Precision Direct injection and twin-turbo technology, which significantly improve performance while driving down BIK and running costs. Drivers also benefit from class-leading comfort options, like the optional Lane Departure Warning System and Head-up Display.

A selection of new engines is compared to the current ones below. Please click [here](#) for the new model list.
